AN ACT

Making appropriation to restore water of high mineral content on land owned and controlled by the Federal Government.

June 22, 1934.

[H.R. 6366.]

[Public, No. 453.]

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That a sum not to exceed \$250 is appropriated, out of any money in the Treasury not otherwise appropriated, to be expended under the supervision of the postmaster at Lincoln, Nebraska, for the purpose of providing a pump which will restore the flow of mineral water to the fountain, the well being dug on Government square about March 15, 1872. The well was put down at large expense by the citizens of Lincoln, Nebraska, and was known as "Market Square Well." The well is now covered over by the Lincoln post-office building, but is in good state of preservation and can be restored to its former use without a large expense. After the well is restored to its former status the citizens of Lincoln are to maintain the well without expense to the Government. The Government owning and controlling the ground, the citizens in justification believe that this restoration of water of great mineral benefit to the community should be made by the Government by means of a small Federal appropriation, as stated, to purchase and install the necessary pump.*
